

**RESPONDING TO WHISTLEBLOWERS
WHEN CONCERNS ARE RAISED VIA SOCIAL MEDIA**

Notes

- The tone of the allegations may be aggressive or personal. Respond politely; don't get drawn into personal exchanges.
- Sometimes the whistleblower may prefer to remain anonymous. It is important not to try to 'out' people who wish to be anonymous.
- It is important to take the discussion away from the public domain; don't engage in specific discussions on social media.
